

Medical Physicist (Experienced/Trainee) Full Time

Sieverts is made up of a highly specialised group of Medical Physicists who travel nationally, providing radiation safety consultancy and compliance testing to radiation equipment, in line with the latest advice in legislative standards of Radiation Protection Authorities across Australia.

We are looking for a highly motivated candidate to assist our growing company, as it continues to deliver this high-quality service to our clients. This role will suit a candidate who:

- Has a high attention to detail and is reliable & trustworthy
- Is a team player and comfortable working with people remotely
- Is competent in working with online applications, CRMs, MS Word and Excel.
- Has strong communication skills
- Articulate and able to talk to clients with confidence
- Able to work within a team environment where job roles may overlap with other physicists.

Position Description

We are looking to hire a Medical Physicist, preferably with 3 to 5 years of relevant experience, to perform the following functions/responsibilities in the organisation for our clients:

1. Shielding Design Reporting and Calculation for various X-ray modalities
2. Performance testing of various X-ray modalities
3. Performance testing of various X-ray premises
4. Radiation Safety Officer functions – audits and advisory
5. Radiation Safety Advisory
6. Patient Dosimetry calculations and reporting
7. Other miscellaneous work when required.

This is a full-time position with a remote working environment. You will be working from home and travelling to clients offices to perform the above functions. Travel within QLD and

interstate will be required as part of the position. The right candidate should also have the following attributes:

- Have the appropriate qualifications to perform the above-mentioned responsibilities.
 - o Hold at least a recognised Bachelor degree (or equivalent) in Physics.
- Have a class "C" license and have their own vehicle go to our client's clinics when required. A company car may be provided for travelling when available.
- Have access to reliable internet in order to perform the necessary work.

The successful applicant must either hold or make significant progress within 12 months of the appointment towards obtaining the appropriate following:

- o Queensland radiation use licence.
- o QLD RSO certificate
- o Radiation use licence of other states when directed by the company.

Remuneration

Sieverts will offer a competitive salary to the right candidate, including 10% super contributions.

Culture

Sieverts Radiation has a unique working culture that is both cooperative and collaborative. People with initiative and conscientiousness in doing the right thing will thrive working with us. We provide a high level of autonomy of doing your work, yet have a degree of accountability to ensure that work is done. We value the contribution of each and every team member. The successful candidate will have the opportunity to join a dynamic team which will utilise technology to get work done and be part of a team.

Benefits of working for Sieverts: Friendly team, flexibility in working from home, access to excellent support and on-the-job training, high level of communication with co-workers.

Please send all applications to the email below. Include a cover letter addressing how your experience addresses the requirements of this position.
